

Cloud Server Requirements (if hosted on your own server)

Last Modified on 08/19/2026 11:04 pm EDT

This article is not yet completed.

A very high level, short answer is:

- Most likely 1-2 (\$6,000-\$10,000) Windows Server(s).
 - Dual Processors from XEON E5 2600 family or better, with 8 cores or higher, with hyper-threading capabilities. (This will provide 32 cores or more).
 - 128GB or more of DDR4 or greater RAM.
 - 2 or more SSD hard Drives with 500GB or more. (Raid 1 or greater).
 - Windows 2016 Server or higher.
 - NOTE: Depending on the # of users it may be a good idea to have TWO servers (ONE for the Web APP and ONE for the SQL Server database).
 - NOTE: Depending on the # of users it may be a good idea to setup VMWare or Hyper-V to enable better/faster disaster recovery.
 - + Windows Client Access Licenses (CALs)
 - + Windows SQL Server Server Licenses
 - + Windows SQL Server Client Access Licenses (CALs)
 - + Windows Internet Information Server (+Configuration)
 - + Static IP Address
 - + Firewall Router
 - + Anti-Virus software
 - + Backup software
 - + Backup management
 - + Windows Server Management.
-
