3. Display Bundle Components on Sales:

- Select Pre-Assembled Bundle- This is where a Bundle is created and put into stock--in advance of the sale--on the Item Detail screen (Bundles tab).
- Select Auto-Assembled Bundle- When a Sales Transaction is placed (and the Bundled item is out of stock) depending on the selected options in Settings, the user can receive a prompt to 'auto-assemble' the bundle on the fly
- Editable Bundle: When a Sales Transaction is placed (and the Bundled item is out of stock) depending on the selected options in Settings, the Bundle components can be displayed on a popup screen--and can be 'edited'--before the components are taken out of Stock.

4. A pop up window will appear Re: Quickbooks does not support creation or editing of Bundle items.... Click OK.
5. Click 'Add Bundle Components' button.
6. 'Item Bundle Components' screen will pop up for you to fill in the components for you to build the bundle
7. Click 'Close'.

8. Tick the checkbox if necessary.
9. Fill in the necessary information.
10. Click Save.

Build the Item Bundle

Please refer to the screenshot below.

1. In the Item List, select the Bundle item you have just created. It will redirect you to the Item Detail screen, click the 'Bundles (Assemblies)' tab.
2. Click 'Refresh' button to calculate the number of items it could create and its individual cost. Please make sure that the Qty in Stock of each components is greater than Zero.
3. In the space provided before the word 'Bundle(s)', fill in the number of items to be built.
4. Click 'Build Bundle' button.
5. A pop up message will appear once you have successfully created/ bundled an item. Click OK.
6. Click Save.

Bundles (Assemblies)

Sort	Bundle Component	Item Description	Labor	Qty Needed	Assembly Notes	Qty Can Build*	Qty in Stock*	Qty Reserved*	Vendor*	Cost*	Extended Cost*	Action
III	Item Test 01	Item Test 01		1		25000	25000	0		\$2	\$2	X
III	Item Test 2	Item Test 2		2		10000	20000	0		\$3	\$6	X
III	Item Test 3	Item Test 3		1		20000	20000	0		\$2	\$2	X

How to Use This Screen:

- Press the **Refresh** button below to calculate how many Bundles you can build (based on your Qty's in Stock).
- Enter Qty to build and then press the **Build Bundle(s)** button to create the Bundles.

You can create **10000** items of this bundle for stock, at an individual cost of **\$10** each. (\$10 parts + \$0 labor).

Refresh **Build Bundle(s)** Build **1000** Bundle(s).

Print Bundle Stock Picking Ticket **Print Bundle Build List**

1 Go to Bundles (Assemblies) tab:
2 Click the 'Refresh' button (to calculate):
3 Indicate the number of pieces you want to build. (In this case I put 10000 pieces):
4 Click 'Build Bundle(s)'. Once it is clicked a pop up message would appear once you have successfully build the bundle.
5 Click 'OK' button:
6 Click Save.

You have successfully created / bundled 10000 of Item: Bundle test.

OK **Click OK**

Save **Help** **Close**

Note: If one of the components have a Zero number in Qty in Stock, 1place will not allow you to build a bundle. (Refer to the screenshot below)
