1place - The new & improved 'cloud' version of OneSource.

Last Modified on 10/23/2026 3:08 pm EDT

Announcing the Brand New Version of OneSource called 1place.

OneSource Software created and has been supporting **OneSource** since 2002. In 2016 we began re-writing (from the ground up) a newer, HTML version of **OneSource** called **1place.cloud**.

1place is 100% cloud (browser) based and runs in a **Microsoft Azure** Data Center using Microsoft's flagship database called **Azure / SQL Server**.

Overall, **1place** is considerably faster, more stable, and more easily upgradable than **OneSource**. If you are a **OneSource** customer, we would greatly appreciate the opportunity to give you a short demo of **1place**. **We trust you will love it!**

What's the Difference Between OneSource and 1place?

Feature	OneSource (older)	1place.cloud (newer)
Developed By.	OneSource Software Solutions	OneSource Software Solutions
Year of First Release.	**2002**	**2020**
Requires Windows Server (including server maintenance).	x	
Runs on Microsoft Access.	x	
Require Login Using Remote Desktop (from Windows Server).	x	
Requires You to Make Your Own Data Backups (or pay for someone else to).	Do it yourself, or by us for an extra fee	Included
Significant chance of database corruption when 2 different users change data on the same screen at the same time.	x	
Includes all basic features of **OneSource** (except Banking & GL), including Customers, Vendors, Items, Quotes, Sales Orders, Invoices/Credit, PO's, Auto POs, Dispatching, etc.	x	x
Quick Search screens can be accessed with keyboard Function keys, such as F3, F4, F5, etc..	x	x
Can Login from any Browser.		x
Looks and runs almost identical to **OneSource** (but on a newer, fresher looking, 'responsive' user interface).		x
Most screens are 2-10x faster than OneSource.		x
Real time backups + additional nightly backups (on Microsoft Azure Cloud + Google Cloud + Amazon AWS Cloud).		x
Runs on SQL Server (faster and more stable).		x
Runs in a secure Microsoft data center (on highly redundant hardware).		x

Replicates (copies) your data to another redundant server (1000+ miles away) in Real Time.		x
Auto Resizes All Fields to Fit (newer, larger) Screens.		x
Able to Resize Columns on the fly.		x
Able to Permanently Hide or Display Certain Columns and Fields (Depending on Preferences).		x
Able to Change Font Sizes.		x
Able to make all fields and fonts larger or smaller, on the fly, using mouse.		x
Email Quotes, Orders, Invoices, Credits, and POs with a few clicks.	(very limited)	x
Customize screens and reports on the fly.	(possible, but complicated)	(Easy)
View (or Download) any report in Excel or PDF.	(possible, for most, but complicated)	(Easy)
Dashboard on Home screen.		x
Automated PO's (Stock Management tool)	x	faster / easier
Automated Stock Transfer's (to replenish satellite warehouses)		x
Warehouse Management screen (to track status of every Order)		x
Multi-Warehouse Stock Transfer	(very limited, and more time consuming)	integrated with new Shipping & Receiving screen
Centralized management of Customers, Vendors, Item List, Item Search Catalog, Item Prices, Item Vendors, Purchasing, etc (for large multi-warehouse companies) while at the same time allowing for each region or warehouse location to operate autonomously.		x
Option to automatically charge a Delivery Fee		x
End of Day Cash Management screen		x
Import / Export Wizard (if you authorize the user)		x
Numerous Real-Time Integrations (for auto parts supply companies) such as CCC, PartsTrader, OPSTrax, etc	x	x
Catalog Manager screen with built in PartsLink Wizard (for auto parts supply companies)		x
Receive Payments screen (with option to import a list of Invoices/Credit being paid or applied)	x	x
Print & Email Statements	x	x
Numerous Detailed & Summarized Sales, Inventory, Purchasing, Customer, and AR Reports	x	x
AP & Banking system (Pay Bills, Print Checks, Manage Bank Account Balances)	x	(requires QuickBooks Online or Sage Intacct)
General Ledger (Chart of Accounts), Financial Reports (Income Statement, Balance Sheet)	x	(requires QuickBooks Online or Sage Intacct)
Integrates with QuickBooks Online (to perform Banking, AP, and print Financial statements).		x
Integrates with Sage Intacct for a more robust way to manage accounting in 1 or more locations (to perform Banking, AP, and print Financial Statements)		x
Option to use Elite Extra to route and track drivers using GPS. (Integration with Descartes coming soon).		x

Option to publish Parts on eBay with a few clicks (from the Item Detail screen).		x
Option to publish Parts on Shopify with a few clicks (from the Item Detail screen).		x
Option to store and authorize/run credit cards on file (in PCI compliant environment) with eBizCharge.com.		x
Option to integrate with ShipStation (or similar shipping software)		(coming soon)
Optional Warehouse Management (Scanning) System	x	more advanced
Optional Customer Portal (to login to check pricing, availability, place Orders, request part returns, etc)	x	x
Built in screen sharing (when you request support)		x
Easier Updates to newer versions.		x
Roll back to a previous version in minutes.		x
Numerous other enhancements.		x
Each New User License	$2,400	Included
Monthly Support / Updates (per user)	$40-$65	$98
ONE TIME Data Conversion Costs to Move all Data from OneSource to 1place	n/a	$4,800 ($400 a month for 12 months)
ONE TIME GoLive Training & Project Management Cost to GoLive on 1place. *(Prices are considerably higher for multi-warehouse companies)*	n/a	$4,800 ($400 a month for 12 months)
Continuous Support Available	Until End of 2026	Indefinitely
